

Portal Hub: partner quick guide

Send your cases to K Line and follow them to your door

portal-hub-jql6.vercel.app

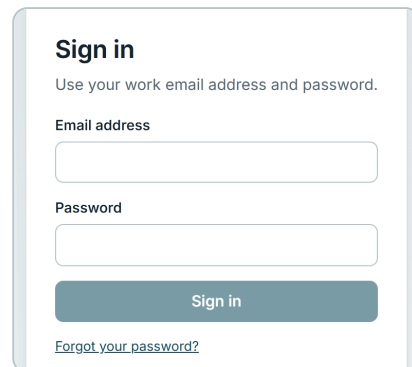

Sign in with your work email address

The Portal Hub is where your company sends clear aligner cases to K Line, and where you see how each one is doing. Most of the work is on one page, **Direct manufacturing**.

1 Sign in

Open the address above, type your work email address and your password, and press **Sign in**. You land on Direct manufacturing.

Forgot the password? Use the link under the button. You get an email to choose a new one.

2 Drop your cases

Put **one folder per case** in a zip file or a folder. Name each case folder with the patient's first and last name, for example *Marc Alonso*.

- Drop it anywhere on the page, or press **Choose a folder**.
- Drop as often as you like. Every drop **adds** to the list and starts uploading at once.
- The drop box stays pinned at the top while you scroll.

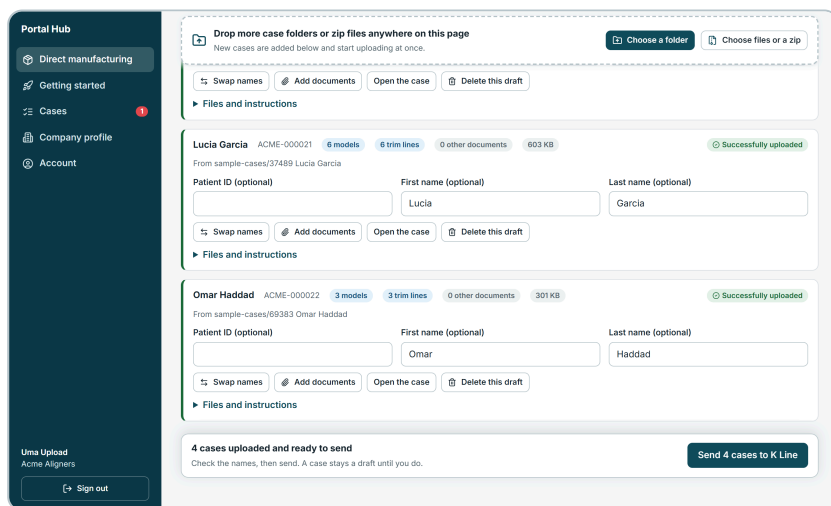

Direct manufacturing before the first drop.

3 Check the cards, then send

Each case becomes a card with its models, trim lines and documents. A green **Successfully uploaded** means the files are safe at K Line.

- The **patient ID and names are optional**. Fix a name by typing, or press **Swap names**. Wrong case? **Delete this draft**.
- Nothing about the files stops you from sending.
- Press **Send ... cases to K Line** in the bar at the bottom. Until you do, a case is only a draft and K Line does not start work.

Uploaded cards, and the bar that sends them all with one press.

Forgot a file? Press the paperclip **Add documents** on any case, on this page, in the Cases list or on the case page. You can add documents until the case enters production.

Follow your cases

Where each case stands, and what to do next

Portal Hub

Partner quick guide, page 2

4 Cases

Every case your company sent is in **Cases**. Each row has **one plain status** and what to do next, for example *Draft, ready to send* or *Received, K Line is processing*.

- The chips at the top filter the list and show how many cases are in each.
- A red number on **Cases** in the menu means something needs you.
- Search by case ID, reference or exact patient name.

REFERENCE	CASE ID	PATIENT	STATUS AND NEXT STEP	UPPER	LOWER	CREATED
ACME-000022	Not set	Omar Haddad	Draft, ready to send Send to K Line	3	0	8 Oct 2026
ACME-000021	Not set	Lucia Garcia	Draft, ready to send Send to K Line	3	3	8 Oct 2026
ACME-000019	Not set	Anna Berg	Draft, ready to send Send to K Line	2	2	8 Oct 2026
ACME-000020	Not set	Marc Alonso	Draft, ready to send Send to K Line	3	3	8 Oct 2026
ACME-000018 <i>Rework of ACME-000014</i>	AC-1014	Oiga Novak	Submitted	1	0	8 Oct 2026
ACME-000017 <i>Replacement of ACME-000013</i>	AC-1013	Yuki Tanaka	Submitted	1	0	8 Oct 2026
ACME-000002	AC-	Iris	Submitted	3	3	7 Oct 2026

The Cases list with counts, one status per case and the paperclip.

5 Open a case

Press a reference to see the progress bar, the details and the files.

- **Draft:** drop more files into the Aligners box, then **Submit case**. **More** holds *Delete draft*.
- **Sent:** you can still add documents with the paperclip. Models and trim lines can no longer change.
- **In production:** the paperclip becomes *Contact K Line*.

Aligners

A draft case. Submit, add documents or open the menu.

6 Shipping address

K Line needs to know where to send your cases back to. In **Company profile**, the **Shipping address** card holds it. It is needed before you can send your first case.

Administrators of your company change it. A case that was already sent keeps the address it was sent with. The same page holds your company logo.

Company profile

Where K Line sends your cases back to, and how your company appears to your team.

Shipping address

This is where K Line sends your cases back to. You can change it later in your company profile. It goes on the label of every case you send with Direct manufacturing, so the carrier knows who receives it. A case that has already been sent keeps the address it was sent with.

Company name on the label Acme Aligners Ltd

Recipient name Alex Acme

Email address goods@acme.demo

Phone number +351276000000

Street and number 1 Rua Direita

Postal code 5400-001

City Chaves

State or province Vila Real

Country Portugal

Save shipping address

Company logo Added

Your logo is required. It shows in the top bar for everyone in your company, so your team and K Line can recognise your account. Every team member except viewers can change it, and the access log records who did.

Company profile: the shipping address and the logo.

If you see "Problem on our side"

Something went wrong while passing your case on to K Line. **Nothing is lost and it is not your doing.** K Line has been told and is fixing it. You do not need to do anything.

Good to know

- Your session ends after 30 minutes without activity.
- Passwords need at least 12 characters.
- Questions? Ask your K Line contact. Patient data is health data: never email it.
